

More than a mission – a passion and a purpose.

Peter Michael Foundation is continuously identifying, developing and advancing new, more effective diagnostic and therapeutic tools and techniques for prostate cancer.

Equally important to what we do is how we do it.

Peter Michael Foundation embraces a philosophy of interconnectedness and quality of life. The dinners of exceptional food and wine raise the funds to support talented physician scientists. Many of those doctors attend the dinners and enjoy the camaraderie. In turn, they often become the sources or advisors on medical care for Foundation friends and family.

Peter Michael Foundation believes in enhancing quality of life in all of its components.
